PROJECT

CampusResell - Demand Test for a Student Resale Marketplace (individual, pilot survey)

- Problem: students on a large residential campus repeatedly buy and discard books, cycles, appliances and electronics, with no trusted way to trade them.
- Designed and ran a 10-question survey of LPU students (20 responses); analysed results in Python (pandas, matplotlib).
- Found 90% would use or consider a student resale platform and 65% want campus pickup for trust, but 95% would pay no per-sale fee, so a commission model is not supported.
- Code, data and charts published on GitHub.

SKILLS

AI and technology: Generative AI, Prompt engineering, Python, Machine learning basics, Oracle Cloud (OCI)
Business and analytics: Market research, Survey design, Data analysis, Business idea validation
Communication: Business communication, Professional writing
